EDUCATION	University of Luxembourg: Doctoral Program in Computational Sciences MSCA PhD candidate. Supervisor: Prof. Stéphane Bordas Aug 19 - present
	Indian Institute of Technology, Madras, India CGPA: 8.5/10.0 Dual Degree: B.Tech (Mechanical) & M.Tech (Product Design), Jul 12 - May 17 Minor: Industrial Engineering
RESEARCH VISITS	Team Mimesis - INRIA, Strasbourg Deep learning for biomechanical simulations. Host: Prof. Stéphane Cotin March 22 - April 22
	Technical University of Munich Semester abroad/research assistant, Mechanical Engineering April 16 - July 16
INTERESTS	My broad interests include scientific computing and the development of interpretable, scalable AI models for their applications to diverse fields. I work on the development of computational methods to tackle challenging problems in science and engineering.

REVIEW ACTIVITIES	Applied Mathematical Modeling (Journal, Impact factor: 5.1)	
OTHER TALKS	Informal PhD presentation (click on the year to see the talk) 2022 Team MIMESIS Seminar, INRIA 2022 Machine Learning Seminar, Team Legato, University of Luxembourg 2020, 2021, 2021 First Finite Element Developers Meet: Vikram Sarabhai Space Centre 2017	
PHD THESIS	Scalable deep learning techniques for scientific simulations <i>Supervisor: Prof. Stéphane Bordas, University of Luxembourg</i> Aug 19 - Ongoing <ul style="list-style-type: none"> - PhD candidate in 'Rapid Biomechanics Simulation for Personalized Clinical Design' (ITN RAIN-BOW), a Marie Skłodowska-Curie European Training Network. - Working on a broad range of deep learning techniques for efficient learning on scientific data. Baysian CNNs for real-time large deformation simulations article <ul style="list-style-type: none"> - Developed a Bayesian U-Net surrogate framework, which can accurately predict non-linear deformations of soft bodies along with the associated aleatoric and epistemic uncertainties. MAGNET: A geometric deep learning framework for mesh-based simulations preprint <ul style="list-style-type: none"> - A novel framework for efficient supervised learning on high dimensional graph-structured data. - Proposed new deep learning layers: Multichannel Aggregation (MAG) and graph pooling/unpooling. - MAG extends the concept of convolutional layers to arbitrary non-grid inputs such as graphs. - Pooling layers enable efficient learning through reduced representations of arbitrary graphs. Attention based deep neural networks for simulating mechanics of solids preprint <ul style="list-style-type: none"> - Implemented state-of-the-art attention mechanism-based network, Perceiver IO, to simulate non-linear soft body responses in real-time (accepted in a leading journal.) - Validated the performance against CNN and MAGNET approaches by implementing them to real-world geometries. Retrieving full field deformations from partial observations of human organs in prep <ul style="list-style-type: none"> - Implemented above described MAGNET framework, which takes sparse partial surface displacement inputs and predicts accurate full-field organ displacements. 	
AWARDS	<ul style="list-style-type: none"> - MSCA fellowship for pursuing doctorate degree in computational sciences. 2019-22 - Best presentation award at the Machine Learning School, University of Bern (400 CHF). 2022 - State Bank of India scholarship covering 95% of the tuition fee at IIT Madras. 2012-17 - Travel award from IWR Heidelberg to attend Bangkok Summer School on Applied Mathematics & Computational Science. 2017 - Travel grant from IIT Madras to present at the First National Finite Element developers conference (One of the less than 10 undergraduates across the country). 2016 - Travel grant from IIT Madras to spend a semester at Technical University of Munich, Germany (accepted) and Seoul National University, South Korea. 2016 - Secured a place among the top 0.3% of 0.6 million IIT-JEE aspirants, hence unlocking doors to IIT Madras, one of the best engineering institutes in India. 2012 - Recipient of the KVPY fellowship from the the Government of India (top 0.5%), offering full financial support to pursue a bachelor degree in pure sciences. 2012 - Recipient of the INSPIRE fellowship from the Government of India (top 0.1%), offering full financial support to pursue a bachelor degree in pure sciences. 2012 - Secured a region rank 6 & 26 in competitive Regional Maths Olympiad. 2009 & 11 - In the top 300 in India in National Standard Examination in Astronomy Olympiad. 2010 - State rank 21 in Maharashtra Talent Search Examination. 2008 	

SKILLS	<p>Languages: Python (proficient), C, C++ (intermediate)</p> <p>Machine Learning Libraries: TensorFlow, TensorFlow Probability, Keras, PyTorch</p> <p>Computational Tools: Matlab, Mathematica</p> <p>Design: (Adobe-) Photoshop, Lightroom, Premier Pro, After Effects</p> <p>Solid Modelling Tools: Autodesk Inventor, AutoCAD, CREO</p> <p>Other: git, Markdown, [z ba]sh, LaTeX</p>
MASTERS RESEARCH	<p>Parallel Processing XFEM Solver for Weak Discontinuous Problems <i>M.Tech Thesis, Supervisor: Prof. Sundararajan Natarajan, IIT Madras</i> <i>Aug 16 - May 17</i></p> <ul style="list-style-type: none"> - Developed a domain decomposition framework for solving large scale finite element problems involving inhomogeneous materials in less than 5% time of the conventional approach. - Implemented eXtended Finite element (XFEM) along with Finite Element Tearing and interconnecting algorithm. <p>Finite Element Tearing and Interconnecting (FETI) <i>May 16 - Jul 16</i> <i>Research Assistant, Chair of Applied Mechanics, Technical University of Munich</i></p> <ul style="list-style-type: none"> - Implemented massively parallel, domain decomposition numerical algorithm FETI to solve large scale static and dynamics problems arising in structural mechanics. - Predominantly worked on preprocessing issues of FETI, explored different finite element open source tools for creating partitions with conforming/non-conforming meshes.
PROFESSIONAL EXPERIENCE	<p>Scientist/Engineer 'SC' in Indian Space Research Organisation (ISRO) <i>At Space Applications Centre, Department of Space, India</i> <i>Jul 17 - May 19</i></p> <ul style="list-style-type: none"> - Member of the team developing mechanisms in satellite payloads & ground segments. <p><u>Development of ground segment mechanism for GSAT-29 satellite</u></p> <ul style="list-style-type: none"> - Developed country's first indigenous high accuracy optical telescope pointing mechanism. - It involved DFX & simulation-based design, validation, fabrication, and final integration. - My design concept was utilized in the onboard payload, which is currently in space. <p><u>Development of 6 meter deployable antenna</u></p> <ul style="list-style-type: none"> - Large communication antennas can't be directly launched into space. - Created a prototype for a foldable antenna whose surface is made from composite fiber mesh. - Antenna has a fold-able metal outer ring and a cable mesh network made of composite threads - Mathematically modeled the optimal mesh network for arbitrary paraboloid surface. <p><u>Gimbal mechanism for Active Radar Calibrator (ARC)</u></p> <ul style="list-style-type: none"> - Automated the existing manual mechanism of ARC, currently being used in Antarctica. - The new mechanism avoided human intervention errors thus improving the measurement accuracy by several folds. <p><u>Automation of antenna testing procedure of Chandrayaan-2</u></p> <ul style="list-style-type: none"> - Developed a motor-controlled automated mechanism that reduced human intervention and decreased testing time by 95%.
STUDENT SUPERVISION	<p>Hardik Jeldiya, "Design and synthesis of support net configuration for deployment space antenna reflector" - Masters thesis at the ISRO.</p> <p>Thomas Lavigne, "Surrogate Modeling of breast soft tissue deformation" - Masters thesis at the University of Luxembourg.</p> <p>Jiajia Wang, "An investigation of real-time interactive simulations for intuitive conceptual design" - First year PhD at the University of Luxembourg.</p>

POSITIONS OF RESPONSIBILITIES	<p>Student Representative <i>June 21 - Present</i></p> <ul style="list-style-type: none"> - For the Doctoral School in Science and Engineering, University of Luxembourg (~600 PhDs) - For the Department of Computational Sciences, University of Luxembourg (~60 PhDs) - For Marie Curie ITN Rainbow network (~15 PhDs) <p>Mentor, Avanti Fellows: <i>Aug 14 - May 15</i></p> <p>Part of the team aiming to help students from less privileged backgrounds to clear competitive university entrance exams, personally mentored two students (one admitted to IIT Delhi).</p> <p>Envisage Coordinator, IIT Madras: <i>May 13 - Jan 14</i></p> <p>Member of India's largest student organised techno-entertainment show with a 4000 footfall.</p>
RELEVANT COURSEWORK	<p>Oxford Machine Learning Summer School 2022, Deep Learning Specialisation: Coursera, Inverse problems: a probabilistic approach, Uncertainty Quantification, Operations Research, Advanced Discretisation methods</p>
EXTRA CURRICULAR ACTIVITIES	<p>Outreach <i>2019</i></p> <p>Tech Fair: European Investment Bank Conference:</p> <p>Demonstrated haptic technology for its uses in personalised medical simulations.</p> <p>National Space Society Exhibition: Nashik Chapter: <i>2018</i></p> <p>Organised an exhibition to educate school children on space engineering and Indian space programs. Attended by 500+ students.</p> <p>Sports:</p> <ul style="list-style-type: none"> - Represented the University of Luxembourg in the PCU Chess cup tournament held at Antwerp. - Winner of the Space Application Center table tennis tournament, represented my center in inter ISRO competition. - Represented IIT Madras in the inter-college table tennis tournament. - Captain of the hostel squash and table tennis team at IIT Madras. - 2 gold and 2 silver medals in squash and 1 gold and 1 silver in Waterpolo in the IIT Madras sports tournament (known as Schroeter). - Represented my district in the Maharashtra state-level table tennis tournament. <p>Music:</p> <ul style="list-style-type: none"> - Written/composed two songs, around 5k+ listens on social platforms: Spotify for artist profile <p>Photography:</p> <ul style="list-style-type: none"> - One of the 10 shortlisted entries of the PCU sports photo contest 2021. My photograph was exhibited in 4 international expositions in Europe: virtual exhibition link - Portfolio with more than 7 lakh views on Pexels as of Jan 23.
